

Perfect Turf

Perfect Turf® Dog Parks

They're doggone PERFECT!

Benefits:

1. No Muddy Paws!

What good is a dog park if no one wants to use it because of the mud? With Perfect Turf® it can rain for days and the dogs will still come in with clean paws!

2. Much easier to maintain than natural grass

No mowing, no weeding, no fertilizer, no dead spots, no watering expense – just green grass 24/7/365.

3. Droppings become dry and hard making clean up a breeze

Owners should pick up after their dogs at the time, but when they don't, it's nice to know that even the worst droppings dry out and are easy to pick up after just one dry day.

Frequently Asked Questions:

Q. *What if a dog starts to dig?*

A. Perfect Turf® is extremely durable and most dogs will give up after an unsuccessful dig. Owners should redirect their dogs if they starts to dig, but if a dog is allowed to damage the turf, it is an easy repair.

Q. *How much maintenance does a Perfect Turf® dog park require?*

A. You will want to frequently hose down the turf, especially in periods with no rain. Periodic cleanings are recommended as well. There will be a small fraction of the maintenance compared to a natural grass dog park. Please request a copy of our PetGrass® Maintenance Guide.

Q. *How long will it last?*

A. You can expect Perfect Turf® to last at least 10 years in a dog park application. It has an eight-year no fade, no fiber degradation warranty.

Q. *How much does Perfect Turf® cost?*

A. Depending on the size and details of installation, a Perfect Turf® dog park can cost between \$7 and \$15 per sq. foot installed. That's a wide range, so call us with your project details and we can give you a more precise quote.
