

Perfect Turf® Dog Parks

*They're doggone **PERFECT!***

Benefits:

1. No Muddy Paws!

What good is a dog park if no one wants to use it because of the mud? With Perfect Turf® it can rain for days and the dogs will still come in with clean paws!

2. Much easier to maintain than natural grass

No mowing, no weeding, no fertilizer, no dead spots, no watering expense – just green grass 24/7/365.

3. Droppings become dry and hard making clean up a breeze

Owners should pick up after their dogs at the time, but when they don't, it's nice to know that even the worst droppings dry out and are easy to pick up after just one dry day.

Frequently Asked Questions:

Q. Can we install it ourselves?

A. Yes, we will support you with detailed written instructions, design and installation details and toll-free telephone support or we can arrange for expert installation. **Perfect Turf®** can be laid over asphalt, concrete or any porous surface that will allow drainage. We recommend 4" – 6" of crushed stone for best drainage in dog parks.

Q. What if a dog starts to dig?

A. **Perfect Turf®** is extremely durable and most dogs will give up after an unsuccessful dig. We have yet to have an area of turf ruined by a dog digging, but if it happened it would not be difficult to repair.

Q. How much maintenance does a **Perfect Turf®** dog park require?

A. You will want to frequently hose down the turf, especially in periods with no rain. There will be a small fraction of the maintenance compared to a natural grass dog park.

Q. How long will it last?

A. We expect Perfect Turf® to last at least 10 years in a dog park application. It has a ten-year no fade, no fiber degradation warranty.

Q. How much does **Perfect Turf®** cost?

A. That depends on a number of factors. Contact us for a free consultation and estimate.

How to get a **Perfect Turf®** Dog Park quote:

Contact us for a ballpark quote over the phone or a site meeting and free no-pressure proposal.
